BEAUTIFUL BARCELONA

Introducing IFDAT 2010

We are pleased to announce the second biannual International Forum for Drug and Alcohol Testing conference! We invite all in the international drug testing industry to join us in an ongoing discussion that continues to influence and educate throughout the world!

Why Should I Attend?

The international employee screening market is experiencing early stage growth, and many US companies are finding access to new business opportunities. Many US multi-national organizations are trying to administer a workplace testing policy on a global basis. IFDAT offers the perfect stage for learning more about this development of the emerging international screening industry.

Anyone managing drug free workplace programs that are international in scope will experience a wealth of information about testing in different regions of the world, including laws and practices in specific countries. IFDAT attendees will be introduced to counterparts from different areas of the globe, and learn more about how testing is being accomplished in their respective

regions. Come and meet providers of international testing services who can assist and partner with you in order to meet your global objectives.

For many, who have not yet had any experience in the international arena, IFDAT will provide you with the necessary knowledge and tools to begin conducting successful testing in these markets.

Featured Speakers

IFDAT conference attendees will hear from prominent professionals from all over the world. These speakers will address topics that include:

- worldwide testing
- alternate testing methods
- legal challenges in testing
- international MRO services
- new technology in testing
- background checks
- testing in aviation industry
- and much more!

Attendee Accommodations
